Want to get your hands dirty on a campus sustainability project and learn about organizational change? If so, then register for **Sustainability & the Campus (ENVIRON 391/RCIDIV 391)**.

This participatory course explores the environmental, social, and economic dimensions of sustainability in higher education—with specific focus on the sustainability practices at U-M.

Students conduct a substantial, hands-on group project in conjunction with a university sponsor as the core component of the course. Through site visits, guest lectures, discussions, lectures and this project, this course aims to address the real life challenges of environmental sustainability, using the campus as a microcosm of larger society.

**Samples of past projects include:**

- **Creating the “How to be a Green Wolverine” Guide**
- **Planning & Planting the Outdoor Adventures Garden**
- **Greening Commencement**
- **Ann Arbor Bike Sharing Program Launch**
- **Launching the Michigan Sustainable Foods Program**
- **Food Waste Composting**
- **Scoping a Solar Roof on the Power Plant**
- **Zero Waste Camp Michigania**
- **Helping Start the “Go Blue Box” Reusable Takeout Containers Program**

**Credits:** 3 Credits

**Instructor:** Michael Shriberg, Ph.D.; Education Director, Graham Sustainability Institute

**Schedule:** Monday, Wednesday & Friday 11:00 - 12:00
